

LiftEase Storage System

Reclaim Your Space

- Innovative, patent-pending storage system designed to utilize often-wasted garage space.
- Store items high on a hidden platform atop a safe, secure, and efficient hydraulic lift.
- System lowers the platform to the floor to allow easy loading of large items such as a lawn mower, power washer or snow blower.
- Eliminate monthly payments for off-site storage.

Changing space is what **LiftEase** is about.

A garage does not have to be a place that the cars barely fit in or in some cases they just sit outdoors.

LiftEase is about storing items and preserving usable space for what it was built for.

Items are stored in a safe, secure and accessible way.

No more standing on a step ladder with a 50 lb. box above your head trying to slide it onto a shelf.

There is a better and safer way

LiftEase Storage System

Reclaim Your Space

Innovative Storage Solution

1. Back out vehicle
2. Lower to floor
3. Load through front or back
